WEB DEVELOPMENT EXPERIENCE

Portfolio Website

https://demetriuswingate.github.io/portfolio/#

- JavaScript, CSS, HTML, jQuery, Bootstrap
- ADA Compliant

JavaScript is implemented in this project first with type.js giving a description of my capabilities, next by using a sticky nav bar with a dropdown menu and smooth scroll to jump to each section. Also, a carousel function in the skills section that coincides with a jQuery 'easy pie chart' and 'super slides' function so that when you reach this point of the page you can visibly see the chart being filled while the percentages are counting up. Some Bootstrap for structure, CSS, and HTML

High Five Farm Website

http://www.highfivefarmky.com/

- JavaScript, CSS, & HTML
- Website for a freelance client in the agriculture industry
- ADA Compliant

This is a basic landing page website used mostly as an information tool. I used JavaScript with the sticky nav bar and drop down, along with a smooth scroll. A beautiful site that's built user friendly with a mobile first approach.

Weather App

https://demetriuswingate.github.io/weather-app/

- JavaScript, Weather API
- IOS application.

Weather app using fetch API from 'openweathermaps.org'.

Crown of Queens Website

https://upfrnt.github.io/crown-of-queens/#

- JavaScript, CSS, & HTML
- Website for a freelance client in the beauty industry

Beautiful website using a side scroll function displaying information about the businesses services, upcoming events, with option to sign up for their newsletter.

Please see [portfolio website](#) for full list of projects

EDUCATION

Code Louisville November 2021
JavaScript II Bootcamp
Completed bootcamp diving deep into the JavaScript technology, learning advanced concepts and topics

Code Louisville August 2021
Frontend Web Development Bootcamp
Completed frontend bootcamp, mastering the basics of HTML, CSS, and JavaScript

EXPERIENCE

UpFrnt Web Development 2019-2022
Web Developer
https://demetriuswingate.github.io/UpFrnt/
- Writes well-designed, testable, efficient code by using web development best practices
- Creates basic website layouts and user interfaces with HTML and CSS while integrating data from various back-end web services and databases
  -Works with clients to gather and refine specifications and requirements based on technical needs
- Creates and maintains software documentation
- Ensures cross-browser compatibility of new features
- Maintains, expands, and scales websites
- Follows emerging technologies and industry trends to apply them to operations and activities
- Collaborates with business partner to realize visual design intent.

  I am a frontend bootcamp graduate with a passion for computer programming and website development. I have over three years of experience managing websites from conception to launch, as well as providing ongoing website maintenance. I have helped several small businesses increased sales and boost web visibility by creating, developing, testing, and launching beautiful and effective websites. I am eager to learn and collaborate with other skilled developers and am open to full-time employment opportunities that will allow me to learn and grow alongside a team of similarly passionate developers.

SOS International, Non-profit Global Health Organization
2018-Current
Operations Manager
- Manages a team of 7 employees by laying out a game plan and expectations every week
- Controls and maintains inventory

- Enters and compiles data to create and run reports on a monthly basis.
- Strong verbal and written skills
- Strategic planning
- IT support
- Conveying processes to partner organizations
- Scheduling
- Research and development skills

As an Operations Manager for five years I have been the primary person to go to for any IT support such as troubleshooting, adding devices to a server or just to contact our network support for solutions. Proven to be able to lead a team by being open to feedback negative or positive and using that as fuel to be more productive. A team player that works well with others and will work around the clock to fill in any gaps to reach our goal in a timely manner. I ask questions to better understand the task at hand and transparency is one of the best values that I can add.
